# Arshad Ali

Web Developer

## WORK EXPERIENCE

MusixGrab June 2025

### Personal Project

A full-stack music platform that allows users to search, play, save, and download music instantly. Real-time search and instant playback without page reloads.

AI WebGen Architect June 2025

### Personal Project

A tool that generates fully functional websites from simple one-line prompts using AI. Accelerates website prototyping from hours to minutes.

EchoWhisper July 2025

### Team Project

Developed during the world's largest hackathon by Bolt. An emotional AI assistant that engages in meaningful conversations to help users maintain their mental well-being. Designed to detect emotional tone and provide empathetic responses.

Chatlytic July 2025

### Personal Project

A privacy-first web app that turns your exported WhatsApp chats into an interactive WhatsApp-style conversation view with powerful analytics.

- Real chat UI recreation
- Trends, top senders, emoji heatmaps
- Sentiment analysis & activity patterns
- AI-powered Q&A for instant insights
